## ABOUT ME

Final-year undergraduate in Industrial Statistics and Mathematical Finance at the University of Colombo, with a strong academic foundation in Statistics, Computer Science, Financial and actuarial mathematics, and Applied Mathematics. killed in Python, SQL, Power BI, and Excel for data analysis, visualisation, and extracting business insights from datasets.Experienced in performing exploratory data analysis, building dashboards, and presenting analytical results clearly. Passionate about applying statistical and analytical skills to solve real-world business problems and eager to gain hands-on experience as a Data Analyst Intern while continuously improving technical and analytical abilities.

## EDUCATION

**BSc in Industrial Statistics and Mathematical Finance** **April 2023 - Present**
University of Colombo

- Coursework in Statistics, Computer Science, Financial Mathematics, Applied Mathematics and Management Science

**G.C.E Advanced Level (A/L) Examination – Physical Science Stream** **2021**
Results : A (Physics),B (Chemistry) , C (Combined Mathematics)

**G.C.E Ordinary Level (O/L) Examination** **2017**
Results : A - 8, B- 1

## PROJECTS

**1.Customer Churn Analysis Dashboard | Power BI, DAX**

- Analyzed 440,000+ customer records to identify behavioral and contractual drivers behind a 56.7% churn rate.
- Built an interactive Power BI dashboard visualizing churn trends across subscription type, contract length, and customer demographics.
- Identified monthly contract customers as the highest-risk segment, providing insights for targeted retention strategies.

**2.SQL Exploratory Data Analysis – Sales Data Warehouse | MySQL, phpMyAdmin**

- Conducted SQL-based exploratory data analysis on 79,000+ sales records across customer, product, and transaction tables.
- Wrote SQL queries to analyze customer demographics, product performance, and revenue trends.
- Discovered top-performing product categories, peak sales months, and customer purchasing patterns to support business decision-making.

**3.Supply Chain Data Analysis | Python, Pandas, Matplotlib, Seaborn**

- Performed data analysis on supply chain datasets covering 100 SKUs and 24 operational features including pricing, logistics, and product quality.
- Used Python data analysis libraries to clean, analyze, and visualize operational data.
- Identified skincare products as the main revenue driver and detected significant variation in supplier defect rates, highlighting opportunities for supply chain quality improvements.

## TECHNICAL SKILLS

- SQL
- Excel
- Python(Basic)
- Java(Basic)
- Data Preprocessing

## SOFT SKILLS

- Willingness to Learn
- Leadership & Team Coordination
- Problem Solving & Decision Making
- Communication & Media Content Creation

## VOLUNTEERING EXPERIENCE

**Board Member – FOS Media** **2024 – 2025**
Faculty of Science, University of Colombo

- Served as a member of the Board of Directors of the official media unit of the Faculty of Science
